

We currently have openings for the following positions:

Clinical Research Associate (CRA) (f/m/d)

We are looking for an experienced Clinical Research Associate (CRA) to join our team at bioskin in Hamburg. The CRA's essential function is to act as a link between sponsor, CRO and trial site as well as the quality control of early phase clinical trials in-house at bioskin as well as multicenter trials at the sites in Germany or other German-speaking countries.

Focus of tasks:

- Performing and reporting site monitoring visits, including site selection, initiation, periodic and close out visits for clinical trials phase I-IV
- Ensuring adherence to international standards (e.g. ICH-GCP), standard operating procedures and clinical trial protocol
- Organizing investigator meetings together with the study team
- Maintaining investigator site files
- Assessing on-going training requirements of all sites staff and take appropriate action
- Identifying and escalating protocol deviations, discrepancies in data, and non-compliance to clinical trial protocols
- Working with different types of eCRF, CTMS systems
- Feasibility of sites
- Preselection visits, initiation visits, periodic monitoring and close out visits
- Collection of essential documents, review and maintenance
- Close cooperation with the different departments in-house at bioskin as well as vendors/freelance CRAs

Profile:

- Degree in a scientific or medical discipline or equivalent
- At least 3-5 years of experience as a Clinical Research Associate are imperative, ideally including multicenter and multinational trials
- Familiar with ICH-GCP guidelines, regulatory requirements, monitoring procedures and understanding of the clinical trial processes
- Experienced in medical device clinical trials and the applicable regulatory requirements
- Well-structured and organized, target-oriented personality, team player
- Ability to thoroughly solve problems and issues
- Fluent in German and English (written and spoken)

- Ability and motivated to travel, including overnight stays
- Competent with MS Office applications
- Candidates with experiences in the indication dermatology will be preferred
